

**The Solar neighborhood
in the age of Gaia**

Table of Contents

- Introduction to Gaia
- Molecular cloud locations/shape
- Young stellar structures
- Galactic context
- Conclusion

Introduction to Gaia

Why you should care about Gaia

- Full sky survey ($M=20$)
- Proper motion, parallax, radial velocity
- Precision: $6.7 \mu\text{arcsec}$ ($M=12$)
 $\sim 100 \mu\text{arcsec}$ ($M=20$)

→ 6D map of solar neighborhood ($\sim 2\text{kpc}$)

Why you should care about Gaia

WS23/24

Why you should care about Gaia

- Star + planet formation/evolution
- Distribution and kinematics of dust and gas
- Kinematics of clusters
- Galactic dynamics and structure formation

→ Broad scientific utility!

What is Gaia?

Technology:

- 2x 1.45x0.5m Primary Mirror
- 10m sun shade
- No reaction wheels, gyroscopes
- Lissajous Orbit at L2

Conclusions

Take Home Message

- Gaia astrometry is extremely powerful
- Even better with photometry from 2MASS
- 3D structure is important
